

User Driven Map

Development:

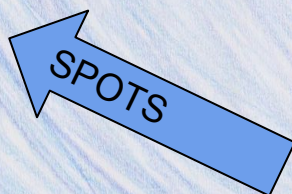

Maps are developed off user contribution, spanning all borders and leaving maps unrestricted

Tokens can be used to buy new spots

Users contribute and rate spots to earn tokens

SKATERS

Current Apps:

Under Populated and Expensive

Manually populating maps is difficult and time consuming

Users contribute spots to map, making map population cheap, efficient, and WORLDWIDE

Anyone can contribute spots any where in the world!

Get new spots everywhere you go!
